

Messa di Voce Installation: More Technical Diagrams

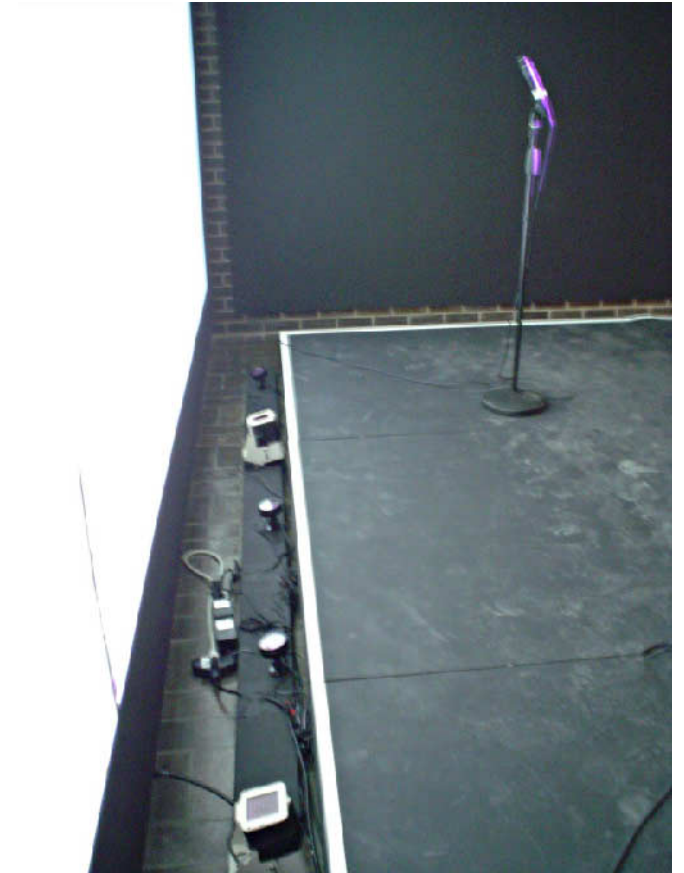

This is the "Stage" platform with wheelchair access ramp. The stage is **330 x 225**. The video projection rectangle is **300 x 225**, and begins **50cm** from the ground, and **30cm** from the side wall.

On the left side, the visitors can modify the installation with the LCD menu screen. (Just below the LCD screen is a USB knob).

The LCD screen is mounted on the exterior wall of the Computer closet.

The platform should go all the way up to the side wall. (The photo above is wrong; there should be NO gap on the left side of the platform.)

This is the area between the Stage and the front projection wall. We require a gap of 30cm in order to place special Infrared lights there.
